Summary

I'm a 26-year-old .NET Developer with two years of hands-on experience in ASP.NET Core MVC and APIs. My passion for coding drives me to excel in both back-end and front-end development, with a focus on clean code. I'm eager to join a team and contribute to innovative web development projects

Skills

- ASP.NET Core
- C# Language
- OOP & SOLID Principles
- Identity
- Database & SQL Server
- JavaScript
- HTML 5

- ASP.NET MVC
- Entity Framework Core
- LINQ
- Authentication
- Database Design
- jQuery
- CSS

- RESTful APIs
- Entity Framework
- SignalR
- Authorization
- Data Structure
- Ajax
- Bootstrap

Experience

.NET Developer, *Z4U SOLUTION*   Jan 2024 – present | Remote, Cairo, Egypt
- I developed with my team 2 completely Applications (ERP System and Restaurant System) and I had done Accounts guide, Invoices, Bonds , Reports ,Orders and Salaries

Full Stack .NET Developer, *Freelancer*   Jun 2022 – Dec 2023 | Remote
- I have personally developed seven fully functional applications from scratch, each with a user-friendly interface that has received 100% client satisfaction.

Projects

ERP System, *ASP.NET CORE MVC, Database first*   Apr 2024 – present
- My team and I are still working on developing this ERP System, and we have finished the invoices, bonds, definitions, evidence, and all privacy processes, and we are currently working on the reports.

Restaurant System, *ASP.NET CORE MVC*   Jan 2024 – Feb 2024
- My team and I developed this system to manage buying and selling operations, payroll, kitchen operations, and everything related to the restaurant management system.

Restaurant Application, *REST APIs , .NET 7 , SignalR* ⧉   Oct 2023 – Dec 2023
- This platform offers an array of services, including menu exploration, table reservations, and streamlined ordering for both dine-in and delivery. Real-time updates on restaurant availability, personalized recommendations, and loyalty rewards enhance user engagement. Built on RESTful architecture, it ensures efficient data retrieval, ensuring an exceptional overall experience

Social Networking Application, *.NET6 , SignalR* ⧉   Aug 2023 – Sep 2023
- My platform's primary focus is on connecting people, enabling the seamless sharing of personal updates, photos, and videos, and facilitating communication through robust features like private messaging and dynamic news feeds. While it incorporates forum-like aspects, it distinguishes itself by providing a broader range of innovative features and interactive communities.

E-Commerce Application, *ASP.NET MVC* ⧉   Jun 2023 – Jul 2023
- This platform streamlines interactions between merchants and customers, boasting a user-friendly interface with an admin dashboard, order management, customer history, and robust authentication and authorization. Users can easily register, explore product catalogs, add items to their shopping carts, and view their pending and completed orders, with the flexibility to cancel orders when necessary.

Store Management Application, *ASP.NET MVC* ⧉   Apr 2023 – May 2023
- I recently launched a business management website tailored for store owners. It offers a user-friendly interface for efficient product, customer, and order management. Key features encompass robust reporting, analytics, and real-time balance tracking, Providing accounts to product owners to keep them informed about their products, all geared toward empowering store owners for success.

Employment Application, *ASP.NET MVC* ⧉   Feb 2023 – Mar 2023
- I developed a website to improve the user experience on a large-scale recruiting effort. The key feature I implemented was a user-centric design, which made the site much easier. Additionally, I included features like user registration and authentication, job application, job posting and searching, and CV uploading to make the process seamless for employers and job seekers.

University Application, *ASP.NET MVC* ⧉   Dec 2022 – Jan 2023
- The website prioritizes user-friendliness for students, instructors, and administrators alike. It offers comprehensive features, including a content management system and detailed course information. Additionally, a streamlined registration system simplifies class sign-ups, while easy access to student information greatly enhances the educational experience.

Languages

- English   • Arabic

Certificates

Web Developing Diploma ⧉ — Approved By Egyptian Ministry of Foreign Affairs & Russian Embassy

Education

Bachelor's Degree in Computer Science,   Jul 2017 – Jul 2021 | Sohag, Egypt
Faculty of Computers and Information - Sohag University

Web Developing Diploma, *Russian Culture Center* ⧉   Jun 2022 | Cairo, Egypt
